## **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows in order to update the priority claim in the specification:

In line 1, page 1 of the specification, the first sentence has been deleted and replaced with;

--This application is a divisional of Serial No. 09/353,668, filed July 15, 1999, now U.S. 6,352,672, which is a continuation of Serial No. 08/651,330, filed May 22, 1996, now abandoned, which is a divisional of Serial No. 08/094,085, filed July 28, 1993, now U.S. 5,527,684, which was a national stage of International application Serial No. PCT/FR92/00069, filed January 29, 1992. --

The Abstract of Disclosure filed in the originally filed specification is objected to because it is not limited to a single paragraph, and further because it includes legal phraseology - specifically the term "said". The abstract has been rewritten and is attached hereto in order to present the abstract in a single paragraph, and to change "said" to --the--.

## ABSTRACT OF THE DISCLOSURE

The present invention relates to a method of measuring the luminescence emitted in a luminescent assay, which makes it possible to correct certain perturbations due to the measuring medium. The method comprises employing at least one luminescent tracer compound and a luminescent compound used as an internal reference, which, when exposed to the same excitation wavelength, are capable of emitting at different wavelengths,  $\lambda_1$  and  $\lambda_2$  respectively, either by direct luminescence or by the induction of a luminescent emission, and correcting the measurement of the luminescence emitted by the tracer compound at wavelength  $\lambda_2$  on the basis of the measurement of the luminescence emitted by the reference compound at wavelength  $\lambda_1$ . The invention further relates to the use of the method in a homogeneous method of detecting and/or determining an analyte, and to a device for carrying it out.
